Drop wire clamp ODWAC-22P / Drop wire clamp 2-pair stainless steel

Product information:

Drop wire clamps, also called flat cable clamps or drop wire clamp 2-pair stainless steel, can be used with telephone drop wire cable, and FTTH drop cable in FTTH, FTTX, FTTB solutions.

These drop wire clamps are mostly used in telecommunication.

Fiber optic cable clamp is equipped with plastic shim, which decrease the tension load on stainless steel clamp, but increase the fiber optical cable support.

The stainless steel bail allows installations of ODWAC FTTH clamps on the buildings, poles, strand with drive hooks, pole brackets, SS hooks and other drop wire fittings and hardware. That can be supplied either separately or together as assembly with FTTH clamps.

Hardware fiber FTTH drop clamp stainless steel and drop wire mounting fittings are available in this product range. Optical fiber drop wire clamps are easily to be pick up according to mechanical resistance and diameter of cables' wire of messenger.

Technical specification
