Suspension airdac clamp ES-1500.1

Product information:

Suspension clamp for LV ABC cable with insulated neutral messenger, another called LV serice or Airdac cable clamp ES-1500.1 is designed to attach Low voltage ABC cables to towers poles or walls, for angles up to 30° towards the pole and up to 50° away from the pole.

This Pigtail type ABC clamp can be used together in LV suspension assembly with suspension bracket PS-1500. This Airdac ABC clamp is a one piece format, assists linesmen by hanging the neutral messenger in open position. ES-1500 allows quick installation by locking adjustable grip clip despite different cable sizes. Toolfree installation provides its universality.
